NetDimension's MatrixEngine 3D Software is a Presentation Finalist at MobiTechFest Americas 2010

NetDimension will present the MatrixEngine, a 3D content development and playback system, at the MobiTechFest Conference on September 21, 2010 in San Francisco, CA.

San Francisco, CA, September 20, 2010 – NetDimension Corp., the developer of the MatrixEngine 3D content development and multiplatform playback system, is one of 12 companies that have been chosen to present to investors and industry executives at Investorfest Media's MobiTechFest 2010 conference at the Microsoft Conference Center in San Francisco, CA on September 20, 2010.

The MatrixEngine consists of the MatrixEngineSDK, a designer-friendly development tool for creating interactive 3D content, and a family of fast-and-light playback engines for phones and mobile devices, PCs, and numerous embedded applications. The MatrixEngine excels at providing fast content development and outstanding 3D performance on platforms with limited resources.

"The MatrixEngine is an incredible tool for developers in the mobile industry," said Makoto Miyakawa, CEO of MultiBind Inc., NetDimension's US division, "because they can quickly create impressive 3D user interfaces, applications, and content that runs on many different mobile platforms, including the iPhone, Android and various feature phones. The

MatrixEngine expands the market for a developer's work, and reduces their development time. In other words: create more apps, for more customers, in less time."

MobiTechFest 2010 will attract more than 120 of the mobility industry's top investors, innovators and executives. The event focuses on bringing together professionals from related disciplines to showcase the most promising innovations from the mobile and WiFi communications industry to a group of leading investors. Investor firms that have confirmed attendance include: Artiman Ventures, Band of Angels, Blumberg Capital, Garage Technology Ventures, GlobeSpan Capital, Granite Ventures, Intel Capital, Javelin Venture Partners, Keiretsu Forum, Matrix Partners, Motorola Ventures, North Bay Angels, Opus capital, Palomar Ventures, Sandhill Angels, Scale Venture Partners, Sierra Ventures, Storm Ventures, TIE Angels, Trinity Ventures, Venrock Capital and Vodafone Ventures

"We are very impressed with both the number and quality of submissions we received for MobiTechFest Americas. This is a showcase of the latest technology being developed in the mobility industry, and the event is a must-attend for innovators and the top investors in the field," said Investorfest Media founder Gopan Madathil. "We are pleased to select NetDimension from a list of more than 60 companies that submitted to present at this exclusive mobile industry focused venture conference."

About NETDIMENSION

NETDIMENSION develops and markets the MatrixEngine™ system for interactive 3D content development and multiplatform playback. In 2010, NETDIMENSION joined the Red Herring Global 100 list of the world's most innovative ventures. The MatrixEngine™ has won numerous industry awards including a 2007 Microsoft Innovation Award, an Interop Tokyo Best of Show Award, and a SPOTY-Software Product of the Year. NETDIMENSION's customers include many of Japan's largest corporations.

NETDIMENSION introduced its new 3D Mobile Kit for the iPhone and Android smart phones at the SIGGRAPH Conference in Los Angeles, July 27-29.
